ABOUT ME

I am a third-year Computer Science and Engineering (CSE) student with a strong passion for Full Stack Web Development and creating modern, responsive, and user-friendly web applications.

I have around 3 months of hands-on experience in full stack web development. I enjoy transforming ideas and designs into interactive web experiences while focusing on clean code, responsive layouts, and user experience.

I am continuously learning and improving my skills by building projects, exploring modern web technologies, and solving development challenges. My goal is to grow as a Full Stack Web Developer, contribute to real-world projects, and collaborate with talented developers to build impactful digital experiences.

I am always open to learning opportunities, collaboration, internships, and projects that help me grow as a developer.
